Allowable Subject Matter

Claims **1, 6-8, 14, and 18-20**, submitted by Applicant on 6/27/2005 are **allowed**.

The following is an examiner's statement of reasons for allowance:

With regard to claim 1, the prior art of record does not disclose a method as claimed, and as interpreted in light of the supporting sections of the specification including page 11 line 19 – page 14 line 5, wherein the shortest path between a start node and end node is determined by identifying the sub-networks associated with the start node and determining whether the end node is associated with one of the identified sub-networks based upon only information stored in the topology database and based upon the type of connector of interest (level 2 or level 3) in combination with all remaining limitations set forth in the independent claim.

The rationale set forth with respect to claim 1, similarly applies to independent claims 14 and 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
